

Will Czechia reach its solar potential?

As Czechia reaches its solar potential, with impending changes to the country's legislative landscape ushering in greater utility-scale solar array rollouts, over 5,000 attendees - government ministers, industry experts, and key business stakeholders - descended on Prague this week for the 2023 Smart Energy Forum.

Why is the solar market growing in Czechia?

The figures mark a period of rapid growth in Czechia's solar market. The growth has been largely driven by residential PV, with most of the new installations (80,069) being domestic PV plants, supported by the country investing an additional CZK 55 billion (\$2.5 billion) in its New Green Savings program back in March 2023.

How many solar power plants are there in Czechia?

In total, 82,799 solar power plants were connected to the grid, with a combined total output of 970 MW. The nation achieved a record-breaking year with 145% growth, connecting 49,000 more power plants than it did in 2022. The figures mark a period of rapid growth in Czechia's solar market.

Will solar power ever eclipse nuclear power in Czechia?

Robert Sedmera, a sales representative for Austrian PV manufacturer Fronius, told pv magazine that the company has operated in Czechia since 1991. He said he does not believe the country's solar capabilities would ever eclipse nuclear, but noted that the public appetite is leaning more towards solar and cheaper electricity prices.

If you don't sell coffee, you don't sell pastries and you don't sell breakfasts! We run about 70% of our business off solar. oneSolar's service is amazing. I make a call if I need them, and they come running - perhaps it's the coffee! I'm so happy that I even installed solar at ...
