

De plus, l'énergie solaire est gratuite et en abondance pendant la saison sèche, lorsque les cultures nécessitent le plus d'eau. Les agriculteurs qui exploitent efficacement cette énergie gratuite en pompant de l'eau pour les champs et dans des réservoirs surélevés pendant la journée, alors que le soleil est le plus brillant, peuvent récolter d'énormes avantages.

Weather conditions in Malawi have become more unpredictable than ever. Severe flooding destroyed much of the harvest in 2015 and was followed by a prolonged drought in 2016. Families have been unable to harvest enough food to survive. Because of this, Villages in Partnership is investing in solar powered irrigation technology. This will allow the...

Below is a guest blog shared from Cedar Hedge Farm in Ontario, Canada, looking at how they managed the unusually dry weather in 2021. These updates were written by Farmer Chris in July 2021 and January 2022. From the different solar pumps they tried, to the impacts of irrigation on crop growth, this is a fantastic read into how solar powered irrigation ...

Spec: Solar-powered irrigation system is an application of solar-powered water pumping system used in paddy fields, gardens for watering the plants, vegetables,, SOLAR PUMP, SOLAR MOTOR, 230
