

# Solar now packages prices Oman

Is solar energy a viable option in Oman?

Solar energy is a viable option in Oman given the vast unused land and available solar energy resources. It could not only cater to the growing need for energy diversification but also help in economic diversification in Oman.

What is Oman Solar?

Oman Solar is a company that uses the latest technology to convert natural resources into electrical power through solar photovoltaic energy. This solution is reliable and suitable for remote applications in the region due to the nearly year-round availability of sunlight. At Oman Solar, we harness the power of the sun.

How much does a solar panel system cost?

Buying an average-size solar panel system generally costs around 2.00 USD per watt, therefore, a 3kw system will cost approximately 6,000 USD (including installation). Leasing a solar panel system is \$0-down and has fixed monthly payments. Whether you buy or lease, the solar energy you produce will lower your utility bill.

How do I pay for solar panels?

With solar panels, we offer a few options for payment: Purchase your system outright and own your energy from day one. Similar to a car loan, you can finance your solar purchase through Symtech Solar and pay in monthly installments. You'll immediately benefit from savings on your utility bill.

Should you buy or lease a solar system?

Purchase your system outright and own your energy from day one. Similar to a car loan, you can finance your solar purchase through Symtech Solar and pay in monthly installments. You'll immediately benefit from savings on your utility bill. With a lease, you'll make low monthly payments with no money upfront.

Where can I install solar panels?

If you have offices with a flat roof or land available for solar panels, you can install solar. You can install solar panels above car parking shades. If you are a manufacturer, you can install solar on your rooftop, on your car parking shades or on available land adjacent to your operations.
