

# Solar power price in Georgia

How much do solar panels cost in Georgia?

Solar panels will save you a lot of money over time, but the upfront costs aren't cheap. The average Georgia homeowner needs a 11.89 kW solar panel system to cover their electricity needs, which comes out to \$31,693 before incentives. Prices range from \$26,939 to \$36,447, but after the federal tax credit, that drops by 30%.

How much does a 5 kW solar system cost in Georgia?

While a 5 kW system will only cost you \$13,173 in Georgia, doubling the system size effectively doubles the price, so you'll pay about twice that for a 10 kW system. The higher the price tag, though, the more you'll get back as a credit towards your federal tax bill. Are solar panels worth it in Georgia?

What tax credits do solar panels get in Georgia?

The federal solar investment tax credit (ITC) is the biggest factor reducing the cost of going solar in Georgia. If you install a residential solar panel system by the end of 2032, you receive a federal income tax credit equal to 30% of the system's total cost. That includes equipment, labor and permits.

How much does solar panel installation cost in Atlanta?

For example, prices for solar panel installation in Atlanta start at around \$25,100, while prices in Helen start at \$28,520. The average cost of solar panel installation in Atlanta is \$37,250, with most people paying between \$25,100 and \$49,400. Compared to the average cost of solar panel installation, this is relatively expensive.

Are solar panels a good investment in Georgia?

Solar power is blooming in the Peach State. Georgians use more energy every month than most Americans, which means installing solar panels in the area is more beneficial from a financial perspective than in most states. However, the high solar panel cost in Georgia can be a deterrent for many homeowners.

Does Georgia pay taxes on solar installation?

The cost of installing renewable energy systems in Georgia, including solar, is supported by the federal solar investment tax credit. This tax credit amounts to 30% of the value of the solar system and is claimed on your taxes in the year following installation.
