Does Georgia Power offer solar?

From home installation and our buy back program, to non-installation options, our goal is to make solar an option for every Georgia Power customer. Learn more about our behind-the-meter solar programs, including the new Renewable and Nonrenewable Resources (RNR) program, and how to interconnect your system.

Are solar panels a good investment in Georgia?

Solar panel costs in Georgia have dropped by 54% over the past decade. The state offers unique solar incentives, targeting large-scale solar farms. Initial solar investment is substantial, but long-term savings and energy independence are significant benefits.

Can a solar battery boost solar power in Georgia?

A solar battery can increase the effectiveness of solar power in Georgia by storing excess energy generated during the day for use during peak hours or during power outages. However, the cost of solar batteries is not low and they can take around 10 years to pay off. Many who would like to go off-grid use solar state incentives to purchase a solar battery pack.
