

Solaris kit Norfolk Island

What is a solariskit solar collector?

The SolarisKit solar collector is the world's first flat-packed, self-assembled solar collector. Our patented flat-packed design makes it easier than ever to ship and install your solar hot water system. Our solar collectors take around 20-30 minutes to assemble with no tools needed.

Who are solariskit?

SolarisKit are the developers of the world's first flat-packed solar collector, a new solar hot water solution that is modern, attractive, simple to install, and easy to ship. Our solar collectors can provide carbon free hot water for homes, hotels, glamping/camping sites, and heating pools and hot tubs and spas.

Where is solariskit made?

Go green in style with SolarisKit. SolarisKit is proudly designed, tested, and made in the UK. We are based at the Michelin Scotland Innovation Parc in Dundee, Scotland. The SolarisKit S400 solar collector has been rigorously tested to European standards by accredited test lab SPF in Switzerland.

How does solariskit work?

The SolarisKit solar collectors are connected together to form an array on your roof or ground turning solar energy into heat. The collectors are connected to an insulated hot water storage tank which stores all the hot water over the course of the day. Insulation reduces any heat losses from the tank.

Does solariskit have a hot water storage tank?

Like any solar hot water system, the SolarisKit solution also has an insulated hot water storage tank. The tank stores the heat collected by our solar collectors so it's ready to be used when you need it. SolarisKit can provide tanks of any size with 180L, 250L, and 300L being our most common.

Is solariskit a Certified B Corp company?

The SolarisKit S400 solar collector has been rigorously tested to European standards by accredited test lab SPF in Switzerland. SolarisKit is proud to be a certified B Corp company, a growing community of companies using business as a force for good. Click the button below to send us a quick enquiry.
