

How is Bess transforming the Philippine energy industry?

With the commercial operations of approximately 1,000 MW of BESS facilities across 32 locations in the Philippines, we are now ushering in a new era for the Philippine energy industry through significant improvements in grid reliability and the integration of more renewable power sources to the country's diverse energy mix.

Will smgp expand Bess?

The project is part of the San Miguel Group's aggressive medium-term goal for power system decarbonization and resilience. When completed, SMGP expects the BESS business to make a significant contribution to its revenues. Ang said the company would consider expanding the group's BESS network "if there is a demand."

How many Bess facilities does smgp have?

Since the first commissioned grid-scale 10 MW BESS facility in Masinloc in 2016, SMGP has completed and commenced the commercial operations of 21 BESS facilities located nationwide. In 2022, SMGP has completed a total of 390 MWh BESS capacity and is in the process of completing the additional 580 MWh this year.

How can smgp bridge the energy security gap?

BESS can be used to bridge the energy security gap by storing excess energy when it is available, and releasing it when demand is high. "When completed, SMGP expects the BESS business to contribute meaningfully to its revenues," the company said.

Does SMC Global have a Bess facility?

As SMC plans to ramp up its RE and clean power investments, SMC Global is adding more BESS facilities combined with solar farms in 10 locations across the country, which are targeted to start operating in 2023.

Is SMC Global Investing in Bess projects?

It was in 2019 when SMC Global first announced plans to invest in BESS projects to complement its development of renewable energy (RE) projects, as part of growing its portfolio. The company is investing over \$1 billion to simultaneously build 31 BESS facilities nationwide.
