

MOSJ (Environmental Monitoring of Svalbard and Jan Mayen) is an environmental monitoring system and part of the Government's environmental monitoring in Norway. An important function is to provide a basis for seeing whether the political targets set for the development of the environment in the North are being attained.

Svalbard and Jan Mayen (Norwegian: Svalbard og Jan Mayen, ISO 3166-1 alpha-2: SJ, ISO 3166-1 alpha-3: SJM, ISO 3166-1 numeric: 744) is a statistical designation defined by ISO 3166-1 for a collective grouping of two remote jurisdictions of Norway: Svalbard and Jan Mayen.

Svalbard and Jan Mayen have in common that they are the only integrated parts of Norway not allocated to counties. While a separate ISO code for Svalbard was proposed by the United Nations, it was the Norwegian authorities who took initiative to include Jan Mayen in the code. Its official language is Norwegian.

The United Nations Statistics Division also uses this code, but has named it the Svalbard and Jan Mayen Islands. Svalbard is an archipelago in the Arctic Ocean under the sovereignty of Norway, but is subject to the special status granted by the Svalbard Treaty.

According to Kepios analysis, 37.0 percent of the population in Svalbard and Jan Mayen, or 944 people, did not use the Internet at the beginning of 2022. This means that approximately the remaining 63.0 percent, or 1,338 people, used the Internet.

ISO 3166-2:SJ is the entry for Svalbard and Jan Mayen in ISO 3166-2, a system for assigning codes to subnational administrative divisions. However, further subdivision for Svalbard and Jan Mayen occurs under Norway's entry, ISO 3166-2:NO:

See towering mountains, stunning fjords, majestic waterfalls and gigantic glaciers as you explore Svalbard, Jan Mayen, Greenland and Iceland. Spend several days soaking up the natural beauty of Northwest Spitsbergen National Park and the Scoresby Sund, the largest fjord system on Earth. Discover volcanic Jan

The program collects and processes data on the environmental impact and the state of nature, wildlife and cultural heritage in the area. The program's mission is also to interpret the data to describe the development of the environment on Svalbard and Jan Mayen, and to advise the administration on the need for action, research or improved monitoring of the areas.

Im norwegischen Sprachgebrauch heißt die Inselgruppe Svalbard („Kühle Küste"). Jan Mayen ist eine 373 km² große Insel ca. 650 km nordöstlich von Island in der Grönlandsee und ist politisch gesehen ein integraler Teil Norwegens, gehört jedoch zu keiner der norwegischen Provinzen. Die Inselgruppe Spitzbergen liegt nördlich des ...

Svalbard and Jan Mayen is a statistical designation defined by ISO 3166-1 for a collective grouping of two remote jurisdictions of Norway: Svalbard and Jan Mayen. While the two are combined for the purposes of the International Organization for Standardization (ISO) category, they are not administratively related. This has further resulted in the country code top-level ...
