

State Grid Party Building Micro Story

Is grid governance based on party corporatism?

We point out that grid governance is reflective of party corporatism--it resembles a specifically established association to unite various social forces to participate in community governance. However, the weight of the decision-making power over the operation of the association lies heavily on the CCP.

Is the grid system a form of state-society relations?

Third, the grid system therefore is also an embodiment of state-society relations, wedged between the people and the party-state hierarchy. Exploring the grid system then provides insights regarding the potential for citizen self-governance and public participation.

How does the grid system achieve social stability?

Hence, the grid system primarily aims at achieving social stability at the grass roots. It does that, as Tang noted, by pooling resources and integrating various actors.⁹ The grid system therefore combines horizontal and vertical linkages across departments and along the party-state hierarchy.

Why do Grid members have a formal link to the party-state?

The formal link to the party-state is important because grid members are bound to it through the contract system. Thus, they are neither public servants nor attached to a work unit. This is despite being assessed in the same way as a civil servant.

How did Beijing's new grid system work?

The hallmark of Beijing's new system was the vertical and horizontal integration of administration. Every 1 of the 589 grids in Dongcheng was assigned a grid manager, a grid support manager, a police officer, a supervisor, a grid party branch secretary, a judicial worker, and a firefighter grid member.

Is grid governance a way to implement political and administrative recentralisation?

We find that while grid governance is an innovative approach to community governance, it has in fact become a way to implement political and administrative recentralisation.
