What is Algeria's solar energy project?

Completed in 2016, the project is a prototype and part of the country's transition, aimed at preserving fossil fuel resources and reduce greenhouse gas emissions. Houari Mahi is the head of engineering of Sonelgaz Energies Renouvelables, he explains to Euronews Algeria's potential regarding solar energy.

Which oil companies are launching a solar lab in Algeria?

The oil giants also inaugurated a solar lab to test the efficiency of different PV technologies under local irradiation conditions. Eni and Sonatrach, Algeria's national gas and oil supplier, said that they will build their new 10 MW solar project at the Bir Rebaa North (BRN) oil production complex in the Berkine basin, in southeastern Algeria.

Is Algeria ready for solar energy?

Houari Mahi is the head of engineering of Sonelgaz Energies Renouvelables, he explains to Euronews Algeria's potential regarding solar energy. "Algeria has 3,000 hours of sunshine per year, and in the case of Laghouat, it is estimated at 1,800 hours per year. This is enough to push us to invest in the construction of photovoltaic structures."

How much solar power does Algeria have?

By the end of 2023, Algeria had 437 MW of solar generation capacity, according to the national Commission for Renewable Energies and Energy Efficiency (CERFE). The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m²/year in the north and 2,263 kWh/m²/year in the south.

How much energy does Algeria produce a year?

The country has an average of 3,000 hours of sunshine per year and global horizontal irradiation of almost 1,700 kWh/m²/year in the north and 2,263 kWh/m²/year in the south. Nevertheless, nearly 100% electrified Algeria generates 99% of its energy from domestic gas.

How is hydrogen produced in Algeria?

Hydrogen is produced by electrolysis. Electrolysis requires electricity. In Algeria, we can produce renewable energy at very low costs, so the hydrogen will also be low cost. Hydrogen can also be produced by other means, for example thermal methods. Now, the other advantage of Algeria is the great solar thermal potential.

Sunica.plus nickel battery. Ready and reliable, even in challenging conditions. Sunica.plus is the perfect solution for remote installations that rely on power generation such as solar panels, wind-turbines and diesel generators. These nickel batteries can be used under the most difficult environmental conditions.
