

# Sun solar energy system Cayman Islands

What are the benefits of solar power in the Cayman Islands?

Supplies sufficient power to Caribbean Utilities Company, Ltd. to serve 1,800 homes in the Cayman Islands. Reduces greenhouse gas emissions by 7,900 tons of CO<sub>2</sub> per year. Serves as the country's only utility-scale solar project, providing renewable energy to the grid's peak load of 110 MW.

Is Cayman the perfect place to harness solar energy?

Significant improvements are being made in the solar energy industry every year and Cayman is the perfect location to harness the power of the sun. Solar energy can be harvested in two ways: solar photovoltaic (PV), which converts sunlight into electricity and solar thermal, which heats water.

What is the first commercial solar project in the Cayman Islands?

The 5MW Solar Farm is the first commercial solar project in the Cayman Islands. It was completed and commissioned in June 2017 and is located on a 20-acre site in Bodden Town, Grand Cayman. The Farm comprises 21,690 poly-crystalline photovoltaic (solar) modules each with a DC-rated capacity of 305 watts.

What to do in Cayman if there is no sun?

Although Cayman enjoys over 300 days of sunshine, you will need to consider an alternative source of power should there be no sun. One such option is the Tesla Powerwall battery. These rechargeable lithium-ion batteries are wall mounted and can be stored either outside your home or inside your garage.

To maximize your solar PV system's energy output in George Town, Cayman Islands (Lat/Long 19.2886, -81.3722) throughout the year, you should tilt your panels at an angle of 17° South for fixed panel installations.

(CNS): The Ministry of Commerce, Planning and Infrastructure (CPI) has re-allocated 700 kilowatts from the government's Consumer Owned Renewable Energy (CORE) power capacity, paving the way for affordable and smaller homes to include solar panels and allowing more people in the community to use renewable energy while remaining on the CUC ...
