

Sunny home manager 2 0 Kosovo

What is the Sunny Home Manager 2.0?

The Sunny Home Manager 2.0 monitors all energy flows in the home, automatically identifies potential savings and facilitates efficient use of solar energy. Intelligent energy management is thus becoming even easier and more cost-effective. Your Benefits Intelligent energy management and power measurement in a single device

What is sunny home manager?

Sunny Home Manager 2.0 Accessories Smart Home Smart Plug (Radio-controlled Socket) With a Smart Plug (radio-controlled socket), the Sunny Home Manager System allows you to measure the power consumption of appliances and switch loads. It is always used universally if your device does not support direct communication (for example, EEBUS or SEMP).

Does sunny home manager have a software update?

PV system devices By default, the automatic software update is activated for the Sunny Home Manager and the devices in the PV system. The Speedwire encryption lets you safely encrypt the local SMA system network with SEC (Speedwire Encrypted Communication) and protect from unauthorized access.

How do I access Sunny home manager?

To go to the Sunny Home Manager system, click on [To the PV system]. The user interface of your system opens. If you have only created one system in Sunny Portal, you will automatically access the user interface of your system after logging into Sunny Portal.

What is a sunny home manager device?

The term device includes all components that exchange data with the Sunny Home Manager, i.e. SMA inverters (including 1 battery or 1 hybrid inverter per system at most), switching devices such as radio-controlled sockets and relays, and also smart appliances (including a maximum of 3 SMA EV Chargers per system).

What data does sunny home manager receive from a PV generation meter?

Upon registering and configuring a PV generation meter in the Sunny Home Manager system, the Sunny Home Manager will receive the power data of the SMA inverters on this PV generation meter.
