

Should investors invest in sustainable solar projects in the Maldives?

In 2014, the first 1.5 MW solar project under ASPIRE only had four investors bids, and resulted in a high power purchase price (PPA) of 21 US cents per unit of electricity, indicating a lack of interest from investors in investing in sustainable projects in the Maldives.

Will a 5 MW solar installation make Maldives a popular destination?

Now, one of the first sights for any of the 1.7 million tourists visiting the Maldives will be that of the 5 MW solar installation on the highway linking the airport island to Male and its satellite town of Hulhumale.

How much does a solar project cost in Maldives?

In 2022, 63 investors expressed interest in the third 11 MW solar project in the remote islands of Maldives, and a record low price of 9.8 US cents was received. This is one of the lowest tariffs for any small island developing state (SIDS).

Can solar power change the Maldives' power-hungry resorts?

Many power-hungry resorts in the Maldives rely on diesel, a notorious pollutant, for their energy needs. Swimsol, a solar power company based in Austria, is working to change that.

What are the challenges facing solar projects in Maldives?

Challenges facing such projects include integrating solar with existing power sources on the grid, off-taker risk, weak procurement, and planning capacity. The objective of the ASPIRE project is to increase photovoltaic (PV) generation in Maldives through private-sector investment. Approved in 2020, the ARISE Project scaled up this process.

What are Maldives doing besides solar?

Besides solar energy, Maldives is setting up an 8MW waste-to-energy plant with assistance from the Asian Development Bank. They also have a pilot on wave energy and are mulling over project proposals on ocean thermal energy conversion, or OTEC. Maldives plans a push for electric vehicles and is seriously looking at the option of green hydrogen. Maldives is not just focusing on solar energy.

energy projects. Being a tropical country with plenty of sunshine, the best fit renewable energy technology has been solar photovoltaics. STELCO was the first company to introduce solar photovoltaics to the Maldives on a commercial scale. In 2012 a 698kWp of solar photovoltaics was installed on the six
