A French delegation visiting Morocco with President Emmanuel Macron on Tuesday unveiled investment plans in the disputed Western Sahara as part of a broader suite of agreements and partnerships between the two countries.. Projects in Dakhla and the Guelmim-Oued Noun region are among the 10 billion euros (\$10.8 billion) worth of initiatives announced ...

Challenges of energy use in agriculture oChallenge 1: Increased pumping demand oChallenge 2: Energy to improve water quality: for brackish water desalination and waste water treatment. oChallenge 3: Intermittent electricity supply in rural areas.

The initial stages of another renewable energy project has been launched in the disputed Western Sahara region, which is under the control of Morocco. The Janassim project recently launched its measuring campaign ...

Regarding the total electrical energy produced, surplus electrical energy, and electrical consumed energy measured in kWh/year as shown in Fig. 12, distributed respectively as follows: In scenario 1, the combined energy generation, excess production, and electrical consumption amount to 613,145 kWh/year, 67,781 kWh/year, and 530,193 kWh/year ...

AN INTRODUCTION In recent discussions here, it's been suggested that we need a brief explanation of Surplus Energy Economics (SEE). This is an interpretation which states that the economy is an energy system, not a financial one. This is the understanding which informs the SEEDS economic model. The timing is certainly appropriate, as established ...

Studies suggest that concentrated solar power (CSP) and photovoltaic (PV) technologies in North Africa could not only meet local demand but also provide surplus electricity (and food!) to Europe...

Intervention by the Saharawi Emma Lehib, during Siemens Energy's Annual Meeting, 8 February 2023.
Intervention by the Saharawi Emma Lehib, during Siemens Energy's Annual Meeting, 8 February 2023

Through its roll-out of massive energy projects in occupied Western Sahara, Morocco becomes more economically connected to, and dependent on, the territory it holds under illegal, military occupation. It intends to export energy generated in the territory to Morocco proper, and to sell off any surplus to

surrounding countries, including the EU.
