Why is environmental monitoring so important in Svalbard & Jan Mayen?

Consequently, considerably more environmental monitoring takes place in Svalbard and Jan Mayen than that which is included in MOSJ. A thorough scientific understanding of the state of the environment there requires that we monitor far more than what may at the moment seem most relevant for decision making.

Do snowdrifts affect solar power plants in polar climates?

In this study we show that snowdrifts pose a significant challenge for solar power plants in Polar climates as they can grow to cover the plant, resulting in reduced power production and an imposed mechanical load on the PV arrays.

Sistema de energia solar on-grid é o sistema que está ligado à rede pública de geração de energia. Sua principal vantagem é a liberdade e a segurança que esse modelo proporciona. Em momentos nos quais a produção de energia ...

Vantagens do sistema fotovoltaico off grid. Para entendermos as benefícios da energia solar off grid, precisamos saber que existem diferentes vantagens entre um sistema de pequeno e de grande porte. Os de pequeno porte são caracterizados pela geração de energia em menor escala, porém ainda independentes da energia elétrica convencional, conectada à rede.
