

Sweetwater energy Yemen

Can Sweetwater Energy replace petroleum?

Sweetwater Energy is looking to change that. The Rochester, New York company has developed a technology that can break down biomass in under 20 seconds and the resulting materials can replace petroleum in a slew of everyday items, says Jack Baron, Sweetwater's president.

What is Sweetwater Energy's sunburst technology?

Sweetwater Energy's Sunburst technology is a disruptive platform technology that enables the biorefinery. We fully deconstruct biomass in 20 seconds, providing clean platform sugars, clean lignin and Microcrystalline Cellulose (MCC) through various pathways. Finally, we can deploy a "whole-barrel" approach to lignocellulosics.

Can Sweetwater help spread sunburst?

That will help Sunburst spread, but Sweetwater has other plans to speed the process. "Our mission really is to ensure that this technology is prevalent throughout every country," Chesonis says. It wants to build a commercial plant in the United States, and it wants additional partners to collaborate with.

Sweetwater Energy, based in Rochester, NY, is helping to build a world that no longer depends on finite, non-renewable fossil fuels and food for its chemicals, plastics and energy. They use a ...
