

Syria factorial battery

What is factorial's new EV battery?

On Tuesday, Factorial introduced its latest breakthrough, Solstice. The new all-solid-state EV battery was developed with Mercedes to power its next-gen models. Factorial said its sulfide-based system addresses concerns over flammable liquid electrolyte designs. It will also maintain stability when operating at temperatures over 194°F (90°C).

Where is factorial battery manufacturing located?

In October 2023, Factorial opened a battery manufacturing facility in the Boston suburb of Methuen, Massachusetts. It expects the facility to be the largest solid-state manufacturing plant in the US when up and running at full 200-MW capacity.

What's happening with factorial's 100-ah solid-state cell?

This month, it sent out its first round of B-samples to Mercedes-Benz for further testing and development. Factorial first revealed its 100-Ah solid-state cell at CES 2023 in collaboration with Stellantis, advancing on from the smaller cells it had shown previously.

Does factorial have a 100-ah cell?

Factorial first revealed its 100-Ah solid-state cell at CES 2023 in collaboration with Stellantis, advancing on from the smaller cells it had shown previously. It began shipping the first 100-Ah A-samples to global automotive partners in October of last year and has now delivered over 1,000 A-sample cells to Mercedes-Benz alone.

Will factorial increase EV range?

With a "breakthrough energy density" of 450 Wh/kg, Factorial claims the new tech can extend EV range by up to 80%. It will also drastically reduce the weight of EVs for even higher efficiency. Factorial aims to unlock over 600 miles of driving range for future electric models with 40% weight savings (compared to traditional Li-ion batteries).

Will factorial be the largest solid-state manufacturing plant in the US?

It expects the facility to be the largest solid-state manufacturing plant in the US when up and running at full 200-MW capacity. In April of this year, Factorial signed a memorandum of understanding with LG Chem toward the acceleration of solid-state battery development.

Amsterdam and Woburn, Massachusetts - Stellantis N.V. and Factorial Inc. unveiled the next chapter in their partnership to accelerate the development and deployment of next-generation electric vehicles (EVs) ...

By utilizing Factorial's solid-state battery technology with over 390 Wh/kg energy density, Stellantis reinforces its commitment to developing high-performing and affordable EVs, both of which ...

Accelerating the switch to electric starts with realistic innovations. Our batteries can be manufactured with minimal modification to existing advanced battery facilities, increasing efficiency and speed to market.

As we await the imminent arrival of the new all-electric Dodge Charger Daytona, Stellantis has confirmed there'll be a fleet of them with solid-state batteries from 2026.. Provided by Factorial ...

This demonstration fleet will enable the validation of Factorial's technology and assessment of its performance in real-world driving conditions. Factorial will supply Stellantis with cells based on its proprietary FESTM; solidstate battery - technology, which enables a specific energy density of over 390 Wh/kg. Factorial 's FESTM; offers

2 ???TM; Factorial's first A-sample 40Ah Solstice(TM) cells showcase significant technical achievement in scaling up all-solid-state battery technology The cells are manufactured utilizing a novel dry ...

Factorial has launched an all-solid-state battery developed with customer Mercedes-Benz to extend EV driving range. Solstice incorporates a dry cathode design for more efficient production. It delivers specific energy of up to 450 Wh/kg while reducing vehicle weight and increasing efficiency, which can extend EV range by up to 80%, according to the ...

Credit: Factorial . Earlier this year, Factorial Energy CEO Siyu Huang told SAE Media her company was "very committed" to bringing solid-state battery technology to the market sooner than basically anyone else thanks to a polymer-based solid-state and quasi-solid-state electrolyte system could theoretically utilize over 80% of the manufacturing processes already ...

Stellantis and Factorial's Bold Step with Solid-State Battery Technology. The world of electric vehicles (EVs) is on the cusp of a major leap forward, and at the heart of this revolution lies Stellantis and Factorial's ground-breaking partnership.. By embracing solid-state battery technology, the two giants are positioning themselves to redefine the EV landscape.

Developed in partnership with Mercedes-Benz, Factorial's all-solid-state battery Solstice(TM) achieves a high energy density that can extend EV range up to 80% and unlocks a more sustainable ...

According to a statement sent to the media, Factorial solid-state battery cells offer "over 390 Wh/kg" energy density, which is a lot. For comparison, Tesla's 4680 cells have between 272 Wh/kg and ...

2 ???TM; Factorial Inc. has unveiled its first Solstice(TM) all-solid-state battery cells with a 40Ah capacity, showcasing a significant milestone in scaling all-solid-state battery technology. ...

The initiative builds upon Stellantis' \$75 million investment in Factorial made in 2021. The demonstration

fleet will utilize Factorial's proprietary FEST solid-state battery technology, which achieves an energy density exceeding 390 Wh/kg.

WOBURN, Mass., September 10, 2024--Factorial Inc. (Factorial), an industry leader in solid-state battery technology, announced today the introduction of Solstice(TM), an all-solid-state battery ...

13 ???· Factorial Energy, a company working on all-solid-state batteries for electric vehicles (EVs), has scaled its initial Solstice battery cells to a capacity of 40Ah, which signifies a vital ...

1 ??· On December 12, Factorial Inc., a leader in solid-state battery technology, announced the company's first Solstice all-solid-state battery cells have been scaled to achieve a 40Ah capacity. These automotive-relevant sized A-sample cells are manufactured with a novel dry cathode coating process and display the impress....
