ENGIE's first battery storage system in Slovakia, utilizing Pixii's PowerShaper technology, began operations in January 2024. This BESS is integral to ENGIE's multi-phase project, enhancing grid stability, supporting renewable energy integration, and laying the groundwork for future energy flexibility services in Slovakia. The challenge

Cerroasperosolar installed this off-grid solar storage system on an island where grid supply is beyond reach. An SPF ES off-grid inverter and two HOPE batteries, both offered by Growatt, were applied in this project, which will generate a green power supply and coexist harmoniously with the beauty of the island.
