

Why is electricity important in Tajikistan?

Electricity is an integral part of Tajikistan's economy, and providing a clean, affordable and secure supply of electricity has been of paramount importance for the government since independence. Despite its energy potential, Tajikistan's energy sector is susceptible to supply shocks.

Why is Tajikistan transforming its energy system?

This report backs the transformation of Tajikistan's energy system, which is capable of achieving energy sector development goals that will provide affordable, secure and clean energy for its population and neighbouring markets, while contributing to the region's energy transition and climate change goals. 1.

How does Tajikistan improve energy statistics data management & use?

Tajikistan has been improving energy statistics data management and use over the past decades, as its Agency on Statistics under President of the Republic of Tajikistan (TajStat) works in close co-operation with regional and international partners enhancing data quality and reporting obligations.

What is the energy system in Tajikistan?

Tajikistan's energy system depends primarily on hydroelectricity, coal and oil. Hydropower and coal are produced domestically whereas virtually all oil and gas must be imported to meet the demand. This also explains the high share of electricity in final consumption, as well as the increasing use of coal in both transformation and industries.

Is Tajikistan a net exporter of electricity?

At the annual level Tajikistan is a net exporter of electricity, but there are seasonal shortfalls of supply. The network losses calculated from the official energy statistics are relatively high, being 14.2% of the supply in 2020 and averaging 15.5% between 2000 and 2020. IEA. All rights reserved.

Which sector consumes the most energy in Tajikistan?

While the industrial sector has historically been the largest energy consumer in Tajikistan, its consumption is now at par with the buildings and transport sectors following significant demand growth in these sectors since 2012.
