

The light solar Lebanon

Does Lebanon have solar power?

Myriam Boulos--Magnum Photos for TIME Lebanon went from generating zero solar power in 2010 to having 90 megawatts of solar capacity in 2020. But the major surge happened when a further 100 megawatts were added in 2021 and 500 megawatts in 2022, according to the LCEC's Khoury.

What's behind Lebanon's solar boom?

The solar boom is a byproduct of Lebanon's crisis. Private installations in businesses and homes since 2020 will have added 350MW of renewable power -- about 5-7 per cent of Lebanon's annual energy needs -- by year-end, said Pierre El Khoury, head of the state-affiliated Lebanese Center for Energy Conservation.

Are Lebanon's solar companies paying a lot for fuel?

We are also paying a lot for fuel." ME Green was one of the early solar-power companies in Lebanon, but the sector has ballooned, from around 150 registered businesses in 2020 to more than 800 today, according to the LCEC's Khoury.

Are rooftop solar panels a good idea for Lebanon?

Rooftop solar panels are offering the promise of a more normal way of living in Lebanon amidst an unsteady electricity supply - for those who can afford it.

Are the mazlouns in Lebanon getting solar panels?

The Mazlouns are hardly alone in Lebanon. Solar panels have been cropping up across the country over the past two years, from the rooftops of rural households to urban apartments, and from atop family-run businesses to buildings housing national and multinational organizations.

Why is Lebanon's solar market so dangerous?

Jessica Obeid, an energy expert, said Lebanon's solar market is suffering from "a lack of regulation, quality control and awareness". The result is significant safety hazards, low-quality equipment, and the installation of solar systems that will cause many consumers to pay tremendous amounts for equipment maintenance and replacement.
