

# The village does not issue a certificate for installing photovoltaic panels

Do I need a building regulations certificate for my solar panel system?

You should receive a building regulations certificate, known as a completion certificate, for your solar panel system. This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system - so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

How do I get Building Regulations approval for solar panels?

To obtain building regulations approval for solar panels, homeowners or installers typically need to submit detailed plans and specifications to the local building control authority. These plans should demonstrate that the installation will meet all relevant standards and regulations.

Do solar panels invalidate NHBC?

Installing solar panels on new builds in the UK doesn't automatically invalidate the National House Building Council (NHBC) warranty, provided the installation is carried out by a fully certified installer and doesn't compromise the structural integrity of the building.

Why do I need a solar panel certificate?

This certificate will assure you and any future owners that the work met all building regulations, which will make it much easier to sell your property at any point. Your installer should send you the certificate after they've commissioned your solar panel system. Can neighbours object to solar panels?
