

Is the marine current power generation project in Trinidad feasible?

Overall, the Marine Current Power Generation project within Trinidad can be seen as feasible, but only over time, where technological advancements are made within the field to increase the efficiency of MCTs, causing a higher optimum power generation to yield the maximum benefits of the Marine Renewable energy technology.

Where do the tides in Trinidad and Tobago come from?

They outflow along the northern continent of South America from the Orinoco River and the Guiana Current coming from the Atlantic through the Columbus Channel. The tides around Trinidad and Tobago are semi-diurnal. High and low tides alternate every 12 hours varying around the coasts, with high tides peaking at 1.2 meters.

How is electricity produced in Trinidad and Tobago?

Source: IEA, 2012b. 19 Since April 2013, all public electricity is produced exclusively from gas, when the Cover power station on Tobago started to operate on gas instead of oil. A Unique Approach for Sustainable Energy in Trinidad and Tobago 24 Carbon Intensity of Power Generation

Will offshore wind power be a major source of electricity in Trinidad?

Offshore wind power will be a significant source of electricity in the future, but before Trinidad can start to explore this resource, the onshore market should be developed, as experience gained with wind turbines on land is essential.

Are EE technologies available in Trinidad and Tobago?

The table shows that even though the potential for EE technologies to deliver energy savings (technical EE potential) is high, the actual uptake is non-existent or low in most cases and high in none. It additionally provides an overview on the availability of technologies in Trinidad and Tobago.

What should the Meteorological Service of Trinidad and Tobago do?

Due to a lack of PV systems in T&T that would reveal the specific energy yield of systems, the Meteorological Service of Trinidad and Tobago should acquire and provide local solar radiation data and allow easy access to this information, especially to reflect local conditions on the different coastal sides of the islands.

Any bought in components used in the arrangement must be accurately specified by manufacturer"s name,

Market analysis of the energy market in Trinidad and Tobago. Find aggregated data relative to energy projects, market players, latest updates and third-party market reports. ... Tidal. 07 ...

Abstract. Geothermal energy is the heat energy within the Earth, often manifested in geysers, hot springs and volcanoes. It offers an energy source that is far more efficient than fossil-fueled power generation, and it doesn"t emit greenhouse gases into the air. Geothermal energy can therefore be very useful in generating electricity however; it currently ...
