

Tuvalu 3 kw solar plant price

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

What was the first large scale solar system in Tuvalu?

The first large scale system in Tuvalu was a 40 kW solar panel installation on the roof of Tuvalu Sports Ground. This grid-connected 40 kW solar system was established in 2008 by the E8 and Japan Government through Kansai Electric Company (Japan) and contributes 1% of electricity production on Funafuti.

How much does a 3KW Solar System cost?

A solar panel system with 3 kW of capacity typically costs around \$9,000-- or roughly \$6,300 after applying the federal investment tax credit, which can recoup up to 30% of your total upfront costs.

Where does Tuvalu electricity come from?

Tuvalu's power has come from electricity generation facilities that use imported diesel brought in by ships. The Tuvalu Electricity Corporation (TEC) on the main island of Funafuti operates the large power station (2000 kW).

Can a 3KW solar system save you money?

The electric bill savings from a 3kW solar system varies widely from state to state. This is because your power bill savings depend on how much energy is produced and how much electricity costs. For example, if your 3kW solar system generates 415 kWh a month in Florida, it will save you about \$46 per month.

How much electricity does a 3KW Solar System produce a month?

Over 30 days, your system would produce about 420 kWh of electricity per month. That's 420 kWh you don't have to pay your utility company for. Based on the national average electricity rate of around 14 cents per kilowatt-hour, a 3kW solar energy system could save you an average of about \$60 per month on energy bills.

With the average cost of solar at \$3.00 per watt as of December 2022, a 3kW solar power system in the US will cost about \$9,000. With the federal solar tax credit factored in, the solar system price drops down to about \$6,300.

As of January 2022, the average cost of solar in the U.S. is \$2.77 per watt (\$8,310 for a 3-kilowatt solar system). That means the total cost for a 3,000-watt (3kW) solar system would be \$6,149 after the federal solar tax ...
