

How TEC is powering Tuvalu with renewable resources?

TEC has set a vision of "Powering Tuvalu with Renewable Resources" and this align well with the Tuvalu Government set target of 100% renewable energy by 2025. All the islands of Tuvalu are on 24/7 power supply and the access rate is 100%. The outer islands are powered by hybrid solar PV system with diesel generator on standby.

Should energy data be consolidated in Tuvalu?

One of the study's recommendation is the consolidation of all energy data, to build an energy balance and to include it in the annual economy report. Since Tuvalu's electricity generation efficiency is low, around 35%, the significance of the electricity sector is higher in the primary energy balance than in final end-use consumption.

Why does Tuvalu use a lot of electricity?

A large proportion of Tuvalu's electricity consumption is a function of the energy efficiency of imported products. It is in the nation's economic interest to set up minimum performance levels for imported household and professional equipment: lighting, cooling, cooking, washing, television sets and other electronics equipment.

How can photovoltaic energy be used in Tuvalu?

This technology could also be used for drying copra quickly and effectively. o To produce electricity from PV cells. Photovoltaic energy, in use in Tuvalu for over 20 years, is a promising electricity production solution but where there is also significant room for technological and economical improvement.

What is the main source of energy in Tuvalu?

The primary energy consumption represents the upstream supply. The only national energy source is biomass (18% of total consumption). Photovoltaic and thermal solar contribute for less than 1%. The balance of supply is oil (Fig. 2). Tuvalu is close to being a totally oil dependent economy.

What is the Tuvalu solar power project?

The Government of Tuvalu worked with the e8 group to develop the Tuvalu Solar Power Project, which is a 40 kW grid-connected solar system that is intended to provide about 5% of Funafuti's peak demand, and 3% of the Tuvalu Electricity Corporation's annual household consumption.

This Tuvalu National Energy Policy (TNEP) is the first ever produced in an attempt to clearly define and direct current and future energy developments and usages throughout Tuvalu. TNEP was developed by the Energy Department and SOPAC following successive consultation workshops that were conducted by a Technical Assistant from ...
