

U S Virgin Islands enlightened energy

Will the Virgin Islands reduce fossil fuel use by 60% by 2025?

The Virgin Islands, with support from the U.S. Department of Energy (DOE) and the Office of Energy Efficiency and Renewable Energy (EERE), have set a goal of reducing fossil fuel use by 60% by 2025.

What is the Virgin Islands Energy Office?

The Virgin Islands Energy Office (VIEO) is focused on promoting sustainable energy policies in the Virgin Islands through clean energy production and distribution, energy efficiency, transportation, and energy consumption. It achieves this through outreach, financial incentives, training, and technical assistance.

How much of the US Virgin Islands' electricity is generated by solar?

In 2020, about 20% of the US Virgin Islands' electricity was generated by renewables. Approximately 80% of this renewable capacity came from customer-installed, small rooftop solar panel systems, while the remaining 20% came from utility-scale solar energy facilities.

What is the primary source of energy in the USVI?

In the USVI, about 70% of all energy is provided by imported petroleum products, with 28 Distillate fuel oil and residual fuel being the main contributors. These petroleum products are primarily used for electricity generation and the production of drinking water supplies.

Why should the US Virgin Islands own solar assets?

The US Virgin Islands should invest in solar assets for enhanced portfolio diversification and risk mitigation. WAPA ownership guarantees coverage by WAPA and FEMA during natural disasters, eliminating uncertainties (1. Enhanced Portfolio Diversity: WAPA diversifies its energy portfolio, ensuring a more resilient and sustainable future).

Why does the US Virgin Islands import petroleum products?

The US Virgin Islands imports nearly all of its energy needs in the form of petroleum products.

T1 - U.S. Virgin Islands 2023 Energy Baseline Report. AU - Olis, Dan. AU - Leddy, Laura. PY - 2024. Y1 - 2024. N2 - This report summarizes the currently available data on U.S. Virgin Islands' energy sector as of December, 2023. It describes primary energy consumption, end uses, energy production, relevant policies, and key challenges, including ...

The US Virgin Islands has some of the highest costing energy in all of the United States and its territories. Advance Power's team has been and remains committed to working with the U.S. Virgin Islands community and related governmental agencies to build an onshore megawatt class wind turbine installation. ... U.S. Virgin Islands. Advance ...
