

Did Russia attack Ukraine's power infrastructure?

A "massive" Russian missile and drone attack has targeted power infrastructure across Ukraine, the country's President Volodymyr Zelensky has said. At least 10 people were killed in the strikes, which hit the capital, Kyiv, as well as multiple targets in several regions including Donetsk, Lviv and Odesa.

Is the energy sector under a massive attack in Ukraine?

"The enemy continues its terror. Once again, the energy sector across Ukraine is under massive attack," Ukrainian energy minister German Halushchenko said on his official Facebook page. The extent of the damage had yet to be clarified, he said, while urging people to remain in shelters.

Could strikes be stepped up in Ukraine?

Mr. Putin suggested that such strikes could be stepped up, after millions of Ukrainians were left without power on Thursday, Ukrainian officials said. Ukraine's energy ministry said it was the 11th major attack on the country's energy infrastructure this year.

Did Russia launch a large-scale attack on Ukraine's energy facilities?

Russia launched a large-scale attack on Ukraine's energy facilities on Friday morning, Ukrainian Energy Minister German Galushchenko said.

Is Russia targeting Ukraine's energy system?

Ukraine's energy system has been regularly targeted by Russia since its full-scale invasion in 2022, with attacks intensifying since the spring of 2024. The targeting of energy infrastructure has had wide-ranging consequences for the provision of energy to Ukrainian households and other consumers.

How many people have been injured in Ukraine's energy crisis?

Six people were reported injured across the country, according to the regional authorities. "The energy sector is under massive enemy attack again," Ukraine's energy minister, Herman Halushchenko, wrote on his Facebook page. The operator of the Ukrainian transmission system "has urgently introduced emergency power outages," he added.
