

VAT reduction and exemption after wind power generation

What are the changes to VAT on wind & water turbines?

The changes reinstated the relief for wind and water turbines and removed complex eligibility criteria. They also introduced a temporary VAT zero rate until 31 March 2027 (after which installations will revert to the reduced rate of VAT at 5 per cent).

What is the VAT relief for energy-saving materials in England & Wales & Scotland?

This item of legislation is currently only available in its original format. This Order introduces a temporary relief from VAT in the form of a zero rate to be applied to the supply of installation of energy-saving materials in England and Wales and Scotland. The relief remains in force for the period from 1st April 2022 until 31st March 2027.

Does VAT apply to the installation of energy saving materials?

Under the EU VAT framework, the reduced rate of VAT applies to supplies of the installation of energy saving materials in housing where it is installed as part of social policy - for those in social need. This is the case in the UK.

When will VAT be refunded for energy saving materials (ESMs)?

The Spring Budget Statement announced additional VAT relief for the installation of energy saving materials (ESMs). Zero rate VAT will apply to qualifying installations from 01 April 2022 until 31 March 2027. From 01 April 2027 the VAT rate will return to 5%.

Will the zero rating of VAT for energy-saving materials continue?

The zero rating of VAT for energy-saving materials has been subject to much change and this flux looks likely to continue.

What is the VAT rate for energy-saving materials (ESMs)?

Written by Louise Speke. First published on 25 Jan 2024, and most recently revised on 26 Jan 2024. When energy-saving materials (ESMs) are installed, a reduced VAT rate (5%) is usually applied. However, there is a temporary zero rate of VAT which applies until 31 March 2027, after which the rate will revert to the reduced rate.

Solar and wind power have zero marginal costs of generation, so projects without a PTC will choose to produce whenever the prevailing electricity price is positive. The PTC changes this calculation. With a PTC, ...
