

Is rooftop solar a good investment in Vietnam?

This is particularly the case for rooftop solar. According to our expert respondents, Vietnam's wind FITs have also been less generous than its solar FITs. Onshore wind power projects have higher installed costs--about US\$2000/MW relative to US\$1100/MW for solar (Lee et al., 2020)--and longer project periods.

Can rooftop solar generators sell electricity to non-electricity of Vietnam (EVN) buyers?

Under Prime Minister Decision 13/2020/QĐ-TTg, rooftop solar generators can now also sell electricity to non-Electricity of Vietnam (EVN) buyers, although details of how this can be done are still being developed by the Ministry of Trade and Industry (MOIT).

Should Vietnam adopt a Renewable Portfolio Standard?

There are other opportunities for Vietnam and the other ASEAN countries. A quantity-focused mechanism in the form of a renewable portfolio standard (RPS) is an option to guide the way toward high levels of renewable energy use and to reduce uncertainty (Burke & Do, 2020).

Singapore's #1 shipping container supplier & container space solution Serving users coming from all industries OSG Social Wall & Container Supplier & Space Solutions ... Vietnam's leading shipping container specialist. We specialise in the sale of quality intermodal ISO shipping containers at most competitive prices with good service and ...
