To skip the detailed overview of the solar industry, go directly to the 5 Most Promising Solar Stocks According to Analysts. Solar energy stocks took a beating in 2023. Global X Solar ETF (RAYS) and Invesco Solar ETF (TAN) are down 41.38% and 29.83% for the year, respectively.

Are solar energy stocks a good investment?

Top solar energy stocks to watch Global energy demand is growing, but so is the reluctance to invest in energy sources that damage the environment and contribute to climate change. This is why investment has grown in areas of sustainable energy, such as solar, wind, hydroelectricity and tidal.

Why are solar energy stocks growing?

The industry's technological advancements and decreasing production costs make solar energy increasingly competitive against conventional energy sources. In addition, government incentives, supportive policies and increasing consumer demand for sustainable energy further drive the growth prospects of solar energy stocks.

What are the best solar stocks to buy?

This compensation may impact how and where listings appear. Investopedia does not include all offers available in the marketplace. The top solar stocks include Daqo New Energy for best value, Altus Power for fastest growth, and Enlight Renewable Energy for most momentum.

Why are solar stocks a bearish investment?

The high-interest rate environment made a bearish case for solar stocks throughout the year due to a demand drop among retail customers. Moreover, California's Net Energy Metering 3.0 policy has reduced incentives for rooftop solar owners drastically.

Why did solar stocks shine as bright in the past 12 months?

Solar stocks shined as bright in the past 12 months despite a continuing shift to renewable energy and lucrative government incentives to install solar infrastructure. Disrupted supply chains, rising interest rates, and policy uncertainty have been among the challenges solar faces.
