When you are buying a home with leased solar panels, you can either get the leasing arrangement transferred to you or insist that the seller clear the balance payments. Typically leases are for 20-25 years. This means, if the solar panel ...

Can I install my own solar panels? We get asked this question over and over. The short answer is: yes! However, it's not really that simple. DIY solar panels may sound like sweet relief for your wallet, but there are a few things to consider before you invest in a home solar kit.

I added panels to my roof and connected them to a large lithium battery bank (18kw). These panels and battery bank are not grid tied. I try to keep the battery bank at about 50% charge. On sunny days if my panels are producing more power than I am consuming then I start charging my EV. The panels and bank are totally off grid.
