

Who should I ask for compensation if there is a problem with the photovoltaic panels

What happens if a solar PV company goes out of business?

Sometimes solar PV companies sell on installations, or the ownership changes if a company goes out of business. If you're unsure who owns the solar panels on your home, you can contact energy regulator Ofgem's Feed-In Tariff Register Team at fitregister@ofgem.gov.uk.

Should you buy a solar PV system for your home?

Well-chosen solar panels can provide a reliable source of renewable electricity for decades, helping to slash your electricity bills and cut your carbon footprint. But buying an inappropriate solar PV system for your home could leave you out of pocket.

What happens if a photovoltaic installation produces more energy than you use?

Throughout the month, your photovoltaic installation may actually produce more energy than you use. What happens in that situation is that the surplus energy is transferred to the distribution network. You get financial compensation for these surpluses. Here is an example of how surplus compensation appears on your bill:

How do I know if a solar PV company is a good company?

Check that the solar PV company is MCS certified. This is often required for government support schemes or to get Smart Export Guarantee (SEG) payments. Check if your installer is a member of RECC. Members agree to uphold high standards of consumer protection. RECC runs dispute resolution if you need it.

Do you have problems with your solar panels?

Nearly seven in 10 owners had had no problems with their solar panels in our survey of over 2,000 owners.* The most common - and most serious - problem owners face is with the inverter. In some cases inverter problems mean you don't get any usable renewable electricity. It can also be a pricey problem to fix.

How do I contract a photovoltaic solar panel installation?

Contract the installation of photovoltaic solar panels. Legally register the installation with the appropriate regional authority: This is where you inform the regional authorities that you would like to benefit from simplified remuneration for surpluses.

"Be sure to ask any potential installer if the suggested panels are the most efficient you can buy. Consumers should look for panels that are 20% efficient or more," he says. What is degradation?

Also ask the company how it has calculated the expected savings. Find out more: are solar panels worth it? Cold call 4: Claiming your solar panel installer has stopped trading (when it hasn't) Some 10% said that a cold caller told them ...
