

# Who to consult about installing photovoltaic panels

## How to choose a solar panel installer?

**Engaging a Qualified Installer:** It is crucial to engage a reputable and qualified installer who is knowledgeable about building regulations and experienced in solar panel installations. They will ensure that the installation meets all the necessary requirements and follows best practices.

## Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

## Can I install solar panels myself?

While it is possible to install solar panels yourself, it is highly recommended to engage a qualified and experienced installer. They possess the necessary expertise, knowledge of building regulations, and access to quality equipment. Hiring professionals ensures a safe and compliant installation that maximizes the efficiency of your solar panels.

## How do I plan a solar panel installation?

Choose a supplier and establish if the installation will fall under Permitted Development or if full planning permission is required 3. Make space for the solar panel accessories (solar inverter, cables and solar batteries, if desired), for instance in a plant room 4. Plan a day for installation 5.

## Do you need a professional to install solar panels?

Despite being intricate bits of kit that can generate electricity from the sun, solar panels are pretty straightforward for a professional to set up. Before an installer is able to crack on with the actual installation, a professional surveyor will need to go into your loft and check the integrity of both the roof and the rafters.

## How do I choose a solar PV company?

Check local planning regulations to make sure you're allowed to install a solar PV system (see above). Check that the solar PV company is MCS certified and a member of the Renewable Energy Consumer Code (RECC). Don't accept a price over the phone before the firm has visited. Get an Energy Performance Certificate for your home.
