

Energy Science & Engineering is the home of high-impact fundamental and applied research on energy and supply and use. Published as a co-operative venture of Wiley and the SCI (Society of Chemical Industry), we are a sustainable energy journal dedicated to publishing research that will help secure an affordable and low carbon energy supply.

World Young Scientist Summit - International Symposium on Carbon Energy and Wenzhou Academician Forum; 19-22 November, 2021; International Carbon Energy Symposium & Carbon Neutral Science Summit 2021; 15-18 November, 2019; Wiley-WZU 2019 International Symposium on Functional Materials for Energy Storage and Conversion

Climate and Energy brings you insightful and timely reporting on the energy industry's most current and compelling topics, including climate change, internationalization, environmental concerns, regulatory and infrastructure modernization, demand, supply and price forecasts, financial techniques, and more.. Contact Editor Echo D. Cartwright to learn more about this ...

This work is performed to prepare new sponge nanocomposites for improving energy storage performance to satisfy cheap cost and high power. The sponge natural rubber/ethylene propylene diene rubber/hexagonal boron nitride (h-BN)/graphene oxide (GO) (NR/EPDM/h-BN/GO) nanocomposite-based supercapacitor demonstrates a high specific ...

We are excited to announce the launch of new journal: Energy Storage. Energy Storage provides a unique platform to present innovative research results and findings on all areas of energy storage. The journal covers novel energy ...

To move away from fossil fuels, global environmental energy conversion and storage capabilities must grow substantially. The mechanical and chemical properties of ceramics, along with their capabilities to directly convert mechanical energy, thermal energy, and solar energy to electrical energy, make them superior materials for advanced energy applications.

The current energy storage system technologies are undergoing a historic transformation to become more sustainable and dynamic. Beyond the traditional applications of Battery Energy Storage Systems (BESSs), they have also emerged as a promising solution for some major operational and planning challenges of modern power systems and microgrids, e ...

Energy Storage is a new journal for innovative energy storage research, covering ranging storage methods and their integration with conventional & renewable systems. Energy Storage: Vol 6, No 5 [Skip to Main Content](#)

Carbon Energy is an open access energy technology journal publishing innovative interdisciplinary clean energy research from around the world.. The journal welcomes contributions detailing cutting-edge energy technology involving carbon utilization and carbon emission control, such as energy storage, photocatalysis, electrocatalysis, ...

Energy Technology is an applied energy journal that provides an interdisciplinary forum for researchers and engineers to share important progress in energy research. We publish articles from all perspectives on technical aspects of ...

We are happy to share some exciting news with you! The Advanced portfolio welcomes a long-anticipated new member that continues our editorial commitment to excellence and rigorous publishing standards. Advanced Intelligent Discovery is the first gold Open Access journal in the Advanced portfolio dedicated to broad-scope research in machine learning, computational ...

Na-ion batteries, as the representative technology of energy storage, play a key role for decarbonization. A great success on the materials and battery design is reported in this manuscript where manganese, sodium, and biomass-derived carbon could afford the challenge to construct sustainable and cost-effective Na-ion batteries for stationary ...

Energy Technology is an applied energy journal that provides an interdisciplinary forum for researchers and engineers to share important progress in energy research. We publish articles from all perspectives on technical aspects of energy process engineering, covering the generation, conversion, storage, and distribution of energy.

Global artificial photosynthesis (AP) has many long-term advantages over currently favored strategies for renewable energy generation and storage, such as small- and large-scale lithium-ion batteries. This paper critiques some of these recent developments in the context of the long-term goal of integrating AP (conducted without enslaving biological life) into ...

Energy Storage is a new journal for innovative energy storage research, covering ranging storage methods and their integration with conventional & renewable systems. Skip to Main Content Search within This Journal Anywhere

Advanced Energy Materials, part of the prestigious Advanced portfolio, is your prime applied energy journal for research providing solutions to today's global energy challenges.. Your paper will make an impact in our journal which has been at the forefront of publishing research on all forms of energy harvesting, conversion and storage for more than a decade.
