The Willard Storage Battery Co. was founded by Theodore A. Willard as the Willard Electric & Battery Co. in 1896 at 33 Sheriff (E. 4th) St. It relocated to 49 Wood (E. 3rd) St. the following year and became a leading company in the development and manufacture of automobile batteries.

Can the Democratic Republic of the Congo produce lithium-ion battery cathode precursor materials?

London and Kinshasa, November 24, 2021 - The Democratic Republic of the Congo (DRC) can leverage its abundant cobalt resources and hydroelectric power to become a low-cost and low-emissions producer of lithium-ion battery cathode precursor materials.

How much would a DRC plant cost?

This is three times cheaper than what a similar plant in the U.S. would cost. A similar plant in China and Poland would cost an estimated \$112 million and \$65 million, respectively. Precursor material produced at plants in the DRC could be cost competitive with material produced in China and Poland but with a lower environmental footprint.

How can Africa extend its access to the battery industry?

In so doing, the country and the rest of Africa can extend their access from the USD271 billion battery precursor segment to the more lucrative USD1.4 trillion combined battery cell production and cell assembly segments of the battery minerals global value chain.

The print ad cost \$12 -- perhaps more than the battery in 1942 -- but only one was available. The Willard Storage Battery Co. was founded by Theodore Willard (at best a remote relation, no rich relatives to bequeath me untold riches) as the Willard Electric & Battery Co. in 1896 in Cleveland, Ohio.
