

What is energy in Belarus?

Energy in Belarus describes energy and electricity production, consumption and import in Belarus. Belarus is a net energy importer. According to IEA, the energy import vastly exceeded the energy production in 2015, describing Belarus as one of the world's least energy sufficient countries in the world. Belarus is very dependent on Russia.

Will ENTSO-E improve the reliability of Belarus's energy system?

The strategic plans of the Baltic States' and Ukraine's energy systems to join the European Network of Transmission System Operators for Electricity (ENTSO-E) energy system have reduced the external connections - and thus the reliability - of Belarus's energy system.

How much oil does Belarus produce?

Despite having the world's third-largest production of peat (544 kilotonnes of oil equivalent [ktoe] or 2354 kt in 2018), and small amounts of crude oil (1 678 ktoe in 2018) and natural gas production (128 ktoe in 2018), Belarus depends heavily on imports to cover its energy demand.

Who regulates electricity in Belarus?

Belarus does not have a single independent energy regulatory authority. The Ministry of Antimonopoly Regulation and Trade is responsible for regulating electricity and heat tariffs for industrial customers, independent suppliers and all categories other than residential consumers, based on the 2011 Decree on Price Tariffs.

Is biomass a source of electricity in Belarus?

Traditional biomass - the burning of charcoal, crop waste, and other organic matter - is not included. This can be an important source in lower-income settings. Belarus: How much of the country's electricity comes from nuclear power?

Is energy security a new issue in Belarus?

6. Conclusion Energy security in Belarus is not a new issue, and several attempts to solve it started in the 1980s, mostly with nuclear power. However, the energy issue was conceptualized as an energy security issue in the aftermath of the "natural gas wars" in the 2000s.
