Manufacturing USA was created in 2014 to secure U.S. global leadership in advanced manufacturing by connecting people, ideas, and technology. Manufacturing USA institutes convene business competitors, academic institutions, and other stakeholders to test applications of new technology, create new products, reduce cost and risk, and enable the manufacturing ...

Figure 1. World Energy Projection System (WEPS) regions Source: U.S. Energy Information Administration WEPS results are sometimes reported according to these aggregate regions: OECD Americas: United States, Canada, Chile, Colombia, Puerto ...

Globally, our progress in shifting towards a low-carbon economy has been slow. That may leave us pessimistic about a path forward. But some countries - often some of the world's richest countries who have high carbon footprints - show us that significant progress on decarbonizing our energy systems is possible. They still have a long way to go but are moving in the right ...

The U.S. Manufacturing Energy Use and Greenhouse Gas Emissions Analysis from the Oak Ridge National Laboratory traces energy from supply (fuel, electricity, and steam) to major end-use applications in U.S. manufacturing. The report ranks the energy use, energy losses, and energy-related greenhouse gas (GHG) emissions of 15 sectors. These ...
