

Yuanming Solar Bracket Installation Instructions

How do I install a solar stack module?

Insert the end clamps laterally in the pedestal. The end clamps are attached and then tightened at the height of the module frame. Modules should be installed to the Solar Stack pedestals with the manufacturer approved middle/end clamps. There are different types of clamps available for the module installation.

How do I install a solar array on a roof?

Using your engineered design, locate the array layout on the roof, and determine mount locations. Measure and determine the spacing between the Solar Stack pedestals according to the solar array design. Mark the lines across the roof for all the mounts.

Who should install a solar panel?

All electrical installation and procedures should be conducted by a licensed electrician or solar contractor. Routine maintenance of a module or panel shall not involve breaking or disturbing the bonding path of the system. All work must comply with national, state and local installation procedures, product and safety standards.

How do I choose the right mounting bracket?

The installer is responsible for selecting the right type of fixing. When fitting the mounting bracket to the wall, ensure that the mounting bracket does not become warped or deformed. When mounting the mounting bracket on the wall, ensure that the mounting bracket does not become warped or deformed.

How do I connect a solar stack module to a pedestal?

Modules should be bonded to the Solar Stack pedestals with the manufacturer approved middle/end clamps. Grounding hardware (as a part of the module clamps) forms secure electrical bonds with both the module and the pedestal, resulting in many parallel grounding paths throughout the system.

How do you install a securebolt?

.SECUREbolt. Rotate ALIGN RAILS: Align one pair of rail ends to the edge of the installation area. The opposite pair of rail ends will overhang installation area. Do not Trim them off until the installation is complete. If the rails are perpendicular to the rafters, either end of the rails can be aligned, but the first module must be installed
